Science Scrum

This science journalism competition challenges you to communicate science and innovation in exciting and creative ways!

The Olympic and Paralympic Winter Games have long been a showcase for science, discovery and innovation. Students in B.C. and the Yukon are invited to create and submit original journalistic pieces addressing the theme, "Science and Innovation in the Vancouver 2010 Olympic and Paralympic Winter Games".

Is it human kinetics that interest you? Green sports facilities? Performance enhancing techniques? The research behind the latest and greatest sporting equipment? Security technologies? Or how about the weather conditions?

Whatever aspect of the Olympic and Paralympic Winter Games you choose, put your media skills to the test and create an original journalistic piece in any medium explaining the science behind it!

All entries must be sent electronically to: programs@bcic.ca

Entries must be received before midnight (PST) December 31, 2008.

Entry format: audio, video or print

Contest details:
